### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 4-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Stuart (US 2002/0126853).

Regarding claims 1 and 11, Stuart discloses a modular air induction assembly (air induction system; Figure 2), comprising:

an air induction body (air inlet duct housing 12);

an air filter (air filter 28)

a speaker (speaker 20);

at least one air inlet (air inlet 16); and

at least one channel to permit air flow (air is drawn into inlet end 16, through the air inlet duct housing 12 to the air outlet 18; page 1, paragraph 8).

Regarding claims 4-7, 12-15, air is drawn from the inlet 16, through the body portion housing the speaker 20 and through the body portion housing the air filter 28 (see Figure 2).

Regarding claims 8, 16, controller 26 communicates with speaker 20 to attenuate noise from engine 14 (page 1, paragraphs 3, 18, 19).

Art Unit: 2643

Regarding claims 9, 17, microphone 22 senses engine noise and generates a noise signal 24 which is sent to controller 26 (page 1, paragraph 18).

Regarding claims 10, 18, the body portion housing the speaker 20 can be considered as a first portion, and the body portion housing the air filter 28 can be considered as the second portion.

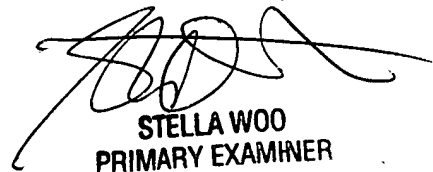

Regarding claims 19-20, Stuart teaches an embodiment in which the resonator 30 is incorporated within the housing (Figure 3) such that all elements are contained within housing 12.
